

Investment Objective and Strategy

The investment objective of the Fund is to provide long-term capital appreciation by primarily investing in listed equities with a China focus. There can be no assurance that the Fund will achieve its investment objective.

The Fund seeks to achieve its objective primarily through exposure to companies established in China or those which, whilst established outside China, derive a significant proportion of their revenue or profits from business related to China. The Fund makes investments into companies that, in the Manager’s opinion, have been undervalued by the market. There is no restriction on market capitalizations or industries in relation to the equity securities in which the Fund may invest.

Under normal circumstances, the asset allocation strategy is that at least 70% of the Fund’s Net Asset Value will be invested in stocks of companies established in China or those which, whilst established outside China, derive a significant proportion of their revenue or profits from business related to China (including but not limited to investment in depositary receipts such as American Depositary Receipts), and, subject to an overall upper limit on onshore PRC exposure of 20% of the Fund’s Net Asset Value, up to 20% of the Fund’s Net Asset Value will be invested directly or indirectly in stocks listed in Shanghai (including stocks listed on the Sci-Tech Innovation Board (the “STAR Board”)) and/or Shenzhen (including stocks in the ChiNext market and/or stocks listed on the Small and Medium Enterprise Board (the “SME Board”)).

Important Note:

1. CFund – China Equity (the “Fund”) invests in (a) stocks listed in China (including Hong Kong, Shanghai and/or Shenzhen) or (b) equity securities listed in Hong Kong of companies established in China or its principal business is located in China or its current majority of income or earnings derived from China. This may result in a higher volatility than a broad-based fund.

2. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting Hong Kong and China markets.

3. The Fund may invest in derivatives. The use of derivatives exposes the Fund to additional risks, including volatility risk, liquidity risk and counterparty/credit risk and credit risk regarding access product issuer.

4. The Fund may invest into other funds. There will be additional costs involved.

5. The Fund can invest in China A-shares through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect programme. These programmes are subject to regulatory risks and other risks such as quota limits, volatility risks and settlements risks.

6. The Fund does not apply any equalisation in the calculation of performance fee, therefore there may be circumstances where an investor may either be advantaged or disadvantaged as a result of the performance fee calculation methodology. Specifically, in the event of the Fund’s outperformance, an investor may be subject to a performance fee regardless of whether a loss in investment capital has been suffered by the investor.

7. Investments involve risks. The Fund, like most funds, does not provide any guarantees. You have the opportunity to lose some or all of your investment. Investment decisions should not be made solely on the basis of this promotional material. Please refer to the explanatory memorandum for information before investing to understand the risk factors and other information. Past performance is not indicative of future performance. If you have any questions, please contact your financial advisor and seek professional advice.

8. The Manager currently intends to make quarterly dividend distribution for the A Units HKD (Dist) class at its discretion. Dividends may be paid out of capital or effectively out of capital of the relevant Class and may result in an immediate reduction of the Net Asset Value per Unit of the Fund.

Fund Manager's Comment

The Hong Kong market began lower in August, influenced by risk-off sentiment from overseas markets, with daily turnover shrinking below HKD70B. The Bank of Japan's rate hike and weak U.S. employment data led to the unwinding of Japanese Yen carry trades, increasing fears of a U.S. recession and affecting market sentiment.

Without significant policy changes from the Chinese government, the market was expected to remain quiet. However, the earnings season in the second half of August provided opportunities to select higher-quality names. Although companies face challenges in driving further top-line growth, market leaders have demonstrated disciplined cost management, resulting in earnings that exceed expectations. These companies have shown promise in the private sector, and with low valuation levels, they continue to attract overseas investor interest. Additionally, the vehicle trade-in program benefited from direct funding from the central government. EV deliveries and penetration rates reached historical highs in August.

At the time of writing, China's macro data continues to deteriorate broadly. However, a larger-than-expected interest rates cut by the U.S. Federal Reserve has improved market sentiment and sparked hope for more stimulus from China. We view this positively and have increased our exposure accordingly.

All comments, opinions or estimates contained in this Fund Manager's Comment are entirely fund manager's judgement as of the date of this report and are subject to change without notice.

Top 10 Stock Holding, Industry Exposure and Geographical Exposure by Listing are calculated by NAV after performance fee accruals.

Futures and Equity swaps in Industry Exposure and Geographical Exposure are calculated by Notional Exposure.

^ Subject to the Manager's discretion, the dividends will be declared on a quarterly basis on such date which is the end of March, June, September and December of each year. Dividends can be paid out of capital or effectively out of capital of the relevant Class and may result in an immediate reduction of Net Asset Value per Unit of the Fund. There is no target level of dividend payout. Estimated annualized dividend (%) = (Dividend per unit x 4) / NAV on Record Date. The Dividends information is for reference only.
